### REPORT FOR INDUSTRIAL VISIT

#### PG & RESEARCH DEPARTMENT OF MATHEMATICS

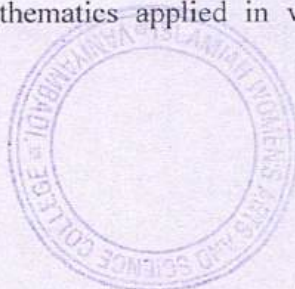

#### "INDUSTRIAL VISIT TO KANCHIPURAM"

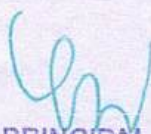

On 15/02/2022, a group of 42 Students With 4 Staffs visited Kanchipuram, a city known for its rich heritage in silk weaving and textile manufacturing. An industrial visit to the Kanchipuram silk industry can be beneficial for Mathematics Students in several ways

Students observed and analysed various aspects of the silk production process that can involve measurement and geometry. They learnt about the precise required for weaving silk sarees, the geometric patterns used in designs and the calculation involved in determining calculations involved in determining the length, width and shape of fabric. By Data Analysis Students collected the data related to the silk industry such as number of silk threads used, the time taken for the production and the cost of raw materials they can analyse this data using statistical techniques such as calculating averages, creating graphs and identifying trends. And by Financial Mathematics Students learnt about pricing strategies, cost analysis profit margins and other financial calculation involved in running a silk business.

On the whole, an industrial visit to the Kanchipuram silk industry provided mathematics students with practical application of mathematical concepts insights into real world data analysis and financial calculations, opportunities to explore optimization problems. It enhanced the understanding of how mathematics applied in various industries and broaden their perspective.
